RE: McCoy WSC Tariff Amendment Regarding Active Meter Status

Dear McCoy WSC Member:

On October 10, 2019, our Board of Directors held their regularly scheduled meeting and took action to define the status of a meter after disconnection, providing for a time limit to “active” status.

After six months of inactivity, the meter will be classified as inactive and removed. The meter’s capacity will be released back to the system. Applications for service at the property will be treated as new service requests and must reapply for a meter slot.

Effective January, 1, 2020, for currently inactive meters, property owners will have 30 days to reactivate their account through the re-service process. After February 1, 2020, that capacity will be returned to the system.

If there are any questions regarding this tariff change, please feel free to contact us.

Sincerely,

The Board of Directors
